

Collective Intelligence Services

Database Administration

NOTE:

"Every year, new technologies are introduced to improve upon the process of doing business. Our clients have been pleased with our ability to quickly understand the true impact of new technology on business computing"

*Chuck Russell
Senior Partner*

"They know their stuff, they deliver what they promise, and because they caught on to the nuances of our project right away, they helped us realize possibilities that we hadn't even envisioned."

*Brian Gottlieb

Collective Intelligence database services provide comprehensive coverage of database design, implementation, tuning, troubleshooting, and application development. Our database administrators possess a wide variety of skills that can be applied to any number of problems. Databases currently supported include Oracle, MS SQL Server, MS Access, DB2, and MySQL. Other less popular database technologies are also supported. If your database does not appear on the list, please contact us.

Database services can be contracted through either fixed-price or time and materials. Collective Intelligence can provide estimates using either approach.

Representative Database Tasks include:

- Database Software Installation
- Data Modeling
- Logical and Physical Schema Design
- Database Creation
- Database upgrades
- Database porting
- Backup and recovery solutions
- Database security
- Performance Tuning and Optimization
- Schema maintenance, enhancement, and modifications
- Extraction, Translation, Load (ETL) script development and debugging

Database Services may also be combined with other solutions and services. For instance, they may become a part of:

- Data warehouse Design and Development project
- Custom application development
- Portal implementation
- CRM and ERP Solutions
- System integration and Service Oriented Architecture
